NEW PRODUCT ANNOUNCEMENT

TINY TROLL

Micro Finance Systems announces the availability of Tiny Troll, an interactive data analysis language for the Apple II and Apple II+ computer. Based on the language TROLL, developed at MIT for econometric research, Tiny Troll offers sophisticated features for problem-solving in the areas of business, finance, and investments. With single, simple commands, one can:

- * display high resolution graphs
- * print out tabular reports
- * perform statistical computations
- * transform data
- * plot mathematical functions
- * do multiple regressions and time-series forecasting

Possible applications include stock and commodity charting, financial ratio analysis, portfolio evaluation, sales forecasting, econometric estimation, and many others. A 100 page manual, which includes tutorials and annotated examples, is provided. The special introductory price is \$100.

Contact Micro Finance Systems, P.O. Box 227, Arlington, MA 02174 (617-926-3809).
